

MS350

Thank you for choosing a product from Standby.

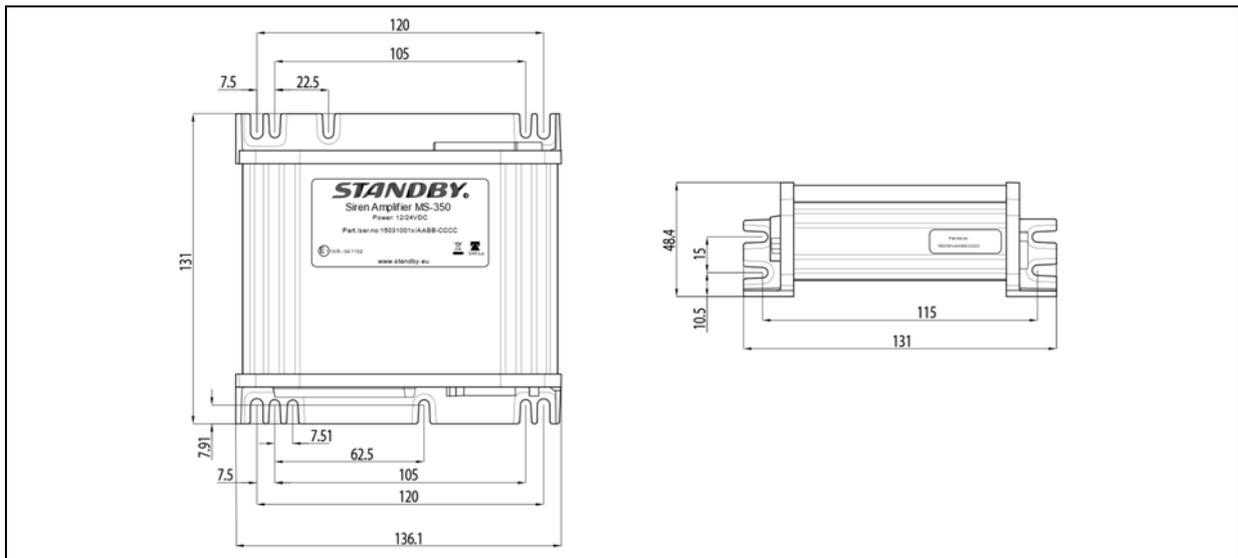

Technical Data

Description	Units
Dimensions	44.6 mm x 136.1 mm x 131 mm
Weight	Approx. 400 g
Nominal voltage	12 / 24 VDC
Operating voltage	10,8 to 14.4 VDC / 21.6 to 28.8 VDC
Limit voltage	-32 to + 32 VDC
Current consumption	< 500µA at standby mode
Inputs	7 x < 20mA, active high 1 x < 20mA, active low
Outputs	2 x < 6A 4 x < 2A
Enclosure rating	IP 54
Approvals - Accoustic - EMC	T046Lu (Swedish approval, only valid together with two KSR350 4Ω(12V)/16Ω(24V)) ECE R10

Included

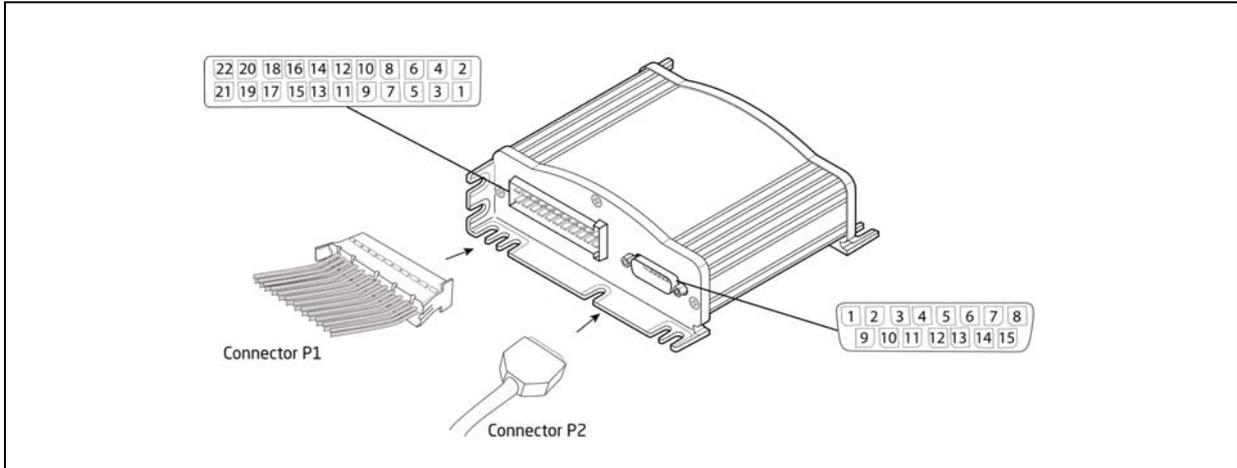

Installation

The Control-Unit can be installed as desired in the vehicle interior. Due to the housing design, the Control-Unit can be variably attached and connected to the vehicle with four screws. Care must be taken to ensure good accessibility of the connectors.

Connection

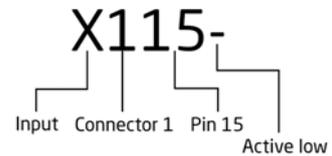

Explanation of naming

- X = Input
- Y = Output
- S = Supply

The first number in the name describes the connector number and the second number the pin number.

- + means active high, connect to positive supply to activate.
- means active low, connect to ground to activate.

Example

Connector P1 22p Female

Connector: AMP, 929504-7 22P

Socket: AMP, 927777-1

For more information regarding functions for each pin see BCD-wheel section

Recommended fuses

All active high inputs should be fused with max 1A.
Pin 3 and 4 (S13+ and S14+) should together be fused max 15A fuse.

Connector P2 SUB-D 15P Female

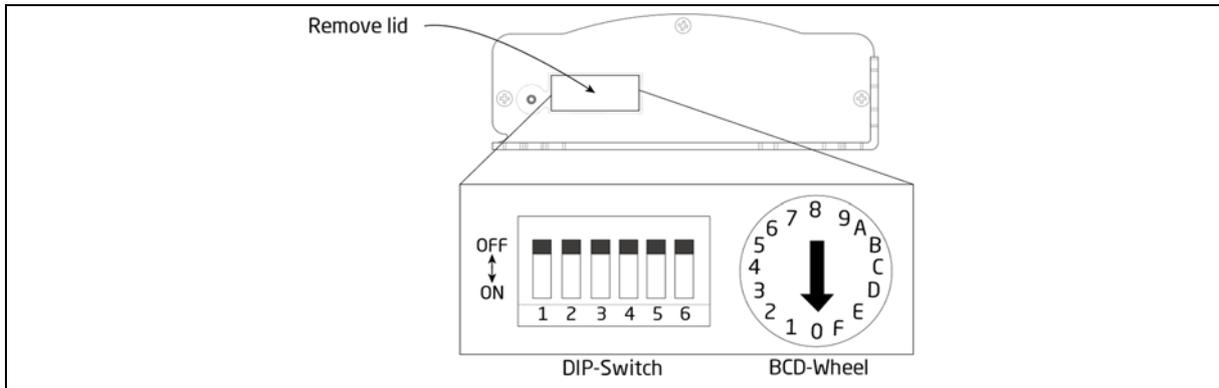

Recommended metal hood: MH Connectors, MHDTZK15-K

Recommended crimp socket: Molex, FL15S7-K121

Recommended crimp contacts: Molex 1731120432, 20-24 AWG

Pin	Function	Standby Name	Pin	Function	Standby Name
1	Output for external devices	Y21+	9	Ground for external devices	Y29-
2	PA microphone PTT +	X22+	10	Audio PTT +	X210+
3	PA microphone + signal, high, 4mV	X23+	11	PA microphone - signal, low, 4mV	X211-
4	PA microphone shield	Shield	12	Audio input - signal, low, 400mV	X212+
5	Audio input + signal, high, 400mV	X25+	13	CAN Low	CANL
6	Not used	Not used	14	Not used	Not used
7	Not used	Not used	15	CAN High	CANH
8	Not used	Not used			

Configuration of DIP-Switch and BCD-wheel

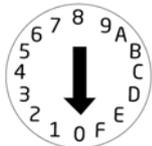

DIP-Switch

DIP No	Function
1	Not used, set to off
2	Not used, set to off
3	Not used, set to off
4	Not used, set to off
5	Not used, set to off
6	Not used, set to off

BCD-Wheel

Turn wheel to choose presets for selected country.

Pos 0 CAN

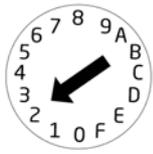

This position is used when the amplifier is connected to a CAN based control system from Standby. The connected control system sets the functionality of the amplifier. Please see the description for the control system regarding functionality and connection.

Pos 1 Stand-alone functions Sweden

Connector P1

Pin	Function	Standby Name	I _{max}	Recommended fuse
1	Beacon left	Y11+	6A	
2	Beacon right	Y12+	6A	
3	Power supply for outputs (Y11+, Y12+, Y15+, Y16+, Y17+, Y18+)	S13+	< 20A	Common fuse max 15A (see connection section)
4	Power supply for outputs (Y11+, Y12+, Y15+, Y16+, Y17+, Y18+)	S14+	< 20A	
5	Status ok loudspeaker	Y15+	2A	
6	Status ok beacon left	Y16+	2A	
7	Status ok beacon right	Y17+	2A	
8	Not used	Y18+	2A	
9	- Loudspeaker left	SP19-	5A	
10	+ Loudspeaker left	SP110+	5A	
11	+ Loudspeaker right	SP111+	5A	
12	- Loudspeaker right	SP112-	5A	
13	Yelp SE (horn-signal, edge triggered) Activate/deactivate the sound. The sound will automatically be deactivated after 10 seconds. Input X117 or X119 must be active to be able to use this function.	X113+	< 20 mA	max 1A
14	Ground MS-350	S114-	10A	
15	Yelp SE (horn-signal, edge triggered) Activate/deactivate the sound. The sound will automatically be deactivated after 10 seconds. Input X117 or X119 must be active to be able to use this function.	X115-	< 20 mA	max 1A
16	Power Supply Amplifier	S116+	10A	10A
17	Hi/Lo wobbling SE (continuous feed) Activates the sound AND the output Beacon. This input has higher priority than X119+.	X117+	< 20 mA	max 1A
18	Beacon (continuous feed)	X118+	< 20 mA	max 1A
19	Hi/Lo clean SE (continuous feed) Activates the sound AND the output Beacon.	X119+	< 20 mA	max 1A
20	Not used	X120+	< 20 mA	max 1A
21	Not used	X121+	< 20 mA	max 1A
22	Air Horn (continuous feed) This sound has higher priority than all other sounds.	X122+	< 20 mA	max 1A
